University of Technology

TU/e Talent Scholarship Program

Start your international career at
one of Europe's best universities of
technology!

Vryan Palma – Philippines

Industrial and Applied Mathematics

"If you're prepared to work seriously for
your future, come to Eindhoven!"

Güven Isiklar - Turkey

Automotive Engineering Science

"I find the program's strong links with
industry a big plus for my studies."

Great career opportunities

Do you want to take your Master's at a leading international university? And do you want to follow that with work experience at a global high-tech company? ...then this is your chance! Eindhoven University of Technology (TU/e), together with international high-tech companies offers scholarships to top international students.

TU/e Talent Scholarship Program (TSP)

Each year a considerable number of scholarships are awarded by the TU/e partnered by top international technology companies and institutes situated in the Eindhoven region and the rest of the Netherlands. Currently ASML, NXP, Océ, Vredestein and Philips are all involved in TSP. The scholarships are awarded to students with the best grades from their previous education at respected universities outside the Netherlands.

The TSP scholarships are for 5 year programs: 2 years studying for your Master's at the TU/e followed by 3 years working at an international organization or a PhD program. So you'll gain international work experience and increase your career opportunities.

The TU/e will match your academic background and particular skills to the requirements of the organizations that fund the scholarships (TU/e and companies).

If you are unable to secure a scholarship or other funding for your TU/e Master's studies, you also have the possibility to access a TU/e loan. Details on this special TU/e loan can be found on www.tue.nl/masterprograms.

Attractive careers in the technological heart of the Netherlands

The TU/e prides itself on it's reputation as being the worldwide number 1 university for scientific output in cooperation with industry.

Furthermore, the Eindhoven region – also known as Brainport Eindhoven – is one of the most innovative centers for advanced technology in Europe. It has, for example, been the base for the technology giant Phillips Electronics for more than a century. Many more multinational companies have research, development and production facilities close to Eindhoven, including ASML and Océ, two of the TSP scholarship partners. The TU/e Talent Scholarship Program may be YOUR chance to get a flying start in your future career in a leading global company.

For more information about economic and business activities in the Eindhoven region, visit www.eindhoven.eu and www.brainport.nl. For more information about careers at TU/e, visit www.tue.nl/en/services/dpo/excellent_jobs_for_excellent_people/. More information about the companies involved in TSP can be found on www.tue.nl/masterprograms.

TU/e: a good choice!

- High-quality of education and research
- Excellent student facilities
- Eindhoven is a modern student city
- International contacts with leading universities
- Good relationships with potential employers
- Excellent reputation of engineers from TU/e
- Attractive career opportunities

Mohammad Alfiad - Jordan

Broadband Telecommunication Technologies

"I finally chose TU/e because of its good reputation. I like it here so much that I'll probably decide to take my PhD at TU/e."

Anitha Sarkar - India

Sustainable Energy Technology

"You don't just acquire technical knowledge, but you also learn a great deal about its application, and that's really useful in industry."

TU/e...where innovation starts

TU/e is a young, modern university with an open, informal and friendly atmosphere. Eindhoven University of Technology specializes in engineering sciences and technology and is internationally respected, appearing in the Times Education Supplements ranking of the top 200 universities worldwide. With its high quality teaching and research, TU/e makes a large contribution to progress in the technical sciences and in technological innovation. As a TU/e student you will be at the heart of these developments.

TU/e values the international exchange of knowledge and participates in European networks of leading universities of technology. There are also strong alliances with leading universities in many countries all over the world. There are currently more than 40 nationalities studying or working at TU/e.

TU/e Master's programs

The Master's degrees at TU/e take two academic years and are conducted in English. TU/e offers 26 Master's programs. All these programs interlink education and research, which means that TU/e students are up close to the latest technological developments. There is a wide choice of specializations and once you have successfully completed your studies you would be granted a Master of Science (MSc). Full information on all TU/e Master's programs, scholarships and the application procedure can be found on www.tue.nl/masterprograms.

Facilities at TU/e

Clearly the core business at TU/e is offering our students top quality education and research facilities. But TU/e offers much more:

- extensive sports and leisure activities at the TU/e sports center;
- a wide variety of student clubs, associations and societies;
- a state-of-the-art notebook computer and distinctive TU/e bike at a very attractive price;
- assistance with priority visa applications;
- help in finding suitable housing;
- a buddy during the 3 week Master's Introduction Program;
- a tutor during your studies
- a coaching program and/or student counselor for study related or personal problems.

More details about all these services can be found on the website <http://w3.tue.nl/en/services/stu/>

So where is TU/e?

The TU/e is located in Eindhoven, the fifth largest city of The Netherlands (often called Holland), situated in the south-east of the country and approximately 50 kilometers from the German and Belgian borders. The official language of the Netherlands is Dutch, but most Dutch people understand and speak English. The country has a knowledge-based society; its prosperity is primarily based on advanced, global services. Eindhoven is a modern city with a lively cultural scene. A wide variety of events, activities and festivities take place throughout the year. More details on <http://www.vvveindhoven.nl/en/>
